(54) PHOTOGRAPH FORMING METHOD

(57)Abstract:

PURPOSE: To obtain a desired print securely by exposing and recording information on a photograph frame as a symbol at a photosensitive part close to the photography frame of a photographic film, and performing print formation on the basis of the information.

CONSTITUTION: When respective photography frames 4 are exposed, information on a photography frame 4 to be exposed is exposed and recorded as a bar code by the information recording mechanism of a camera through an exposure window 9 for information recording at a photosensitive part 11 close to the photography frame 4. The photographic film 10 after photography is taken out of a cartridge 6 and developed. The symbol (bar code) recorded at each photosensitive part 11 is made visible, this negative film is mounted on a printer to read its symbol by a reading mechanism, and a print processing mechanism is driven on the basis of the read information to form a print of the photography frame 4.
